## About This Game

Once upon a time, arcade shooter gamers where you have to fend off impending waves of an alien menace, was all the rage, but while retro may be old, it is never forgotten. So, inspired by an arcade classic, Super Destronaut DX is retro space shooter that pits you against an enemy more dreaded than a UFO, a scoreboard. With multiple modes and high-scores that can be attained by yourself and players all over the globe, this is a game that will put you on the path of achieving a score as high as you can possibly muster.

So, if you are a fan of old-school shooters, be prepared to feel right at home and if you have a friend who is just as passionate as you are about shooting, why not have them play with you. With support for a local multiplayer mode, maybe the two of you together have just what it takes to beat the invading aliens once and for all and secure the top spot! You know you want too.

### Features:

- 30 different Challenges to complete
- 3 modes in the form of Classic Mode, Time Attack & Hardcore

Crashes to desktop windows 10. Do not purchase.. This is a disgusting rip off of a game. DO NOT BUY IT. IT IS A CASH GRAB. After 5,500+ hours in ark, I can say for sure that this is just a complete ♥♥♥♥ing rip off. The megapithecus and therizinos look like n64 characters.. It was a good time pass....

Try it if it is cheap and you like point and click games :). Csgo sucks anyways

Low Quality

Textures are bad

You play with kids

Recomend black ops then any other shooter game

What does everyone use in the vid?

Only awp's and pistol's because they really suck that they need 1 shoters. An angry ape, crashing percussion, and violence makes APE OUT one of the best adaptations of 2014's *Whiplash* on the market. I liked the game very much back in the day it was released so I bought 2 copies on Steam since the game seems to have LAN multiplayer to play with my friend. We used Hamachi and wanted to play... but apparently LAN dosent work in this game as we didnt see each other in LAN game list. Suffice to say I wasted money on this and I cannot recommend it, seeing how they managed to broke such a simple thing as LAN functionality in a game whose normal boxed version has normal working LAN MP

if you are looking for multiplayer experience here then stay away. There is none

its like a stealty bomberman. Fun to play!. One of the worst racing games I've ever played..

Тиймээс би энэ тоглоомонд 9/10 өглөө. Plays a bit better in the pyhsics but other than that its the same old boring gameplay were i find myself getting bored after the first lap, The main concern is there is no commentary, I know racing games dont get commentary but damn this near puts u to sleep.. This game is Dope yo. Y'ALL NEED TUH PLAY THIS HERE GAEM BOI. GOL DURN SUN \u2665\u2665\u2665\u2665\u2665. This is literally the best game ever created in all of time. You are a piece of toast. A PIECE OF TOAST. Also good voice acting.. An underappreciated game! While yes it's a mobile port, and yes it's graphics are definitely improvable, the gameplay is fun and flows well for what it is (plus the port feels fairly unclunky with exception to a fixed camera-angle and less percise controls).

If the game looks interesting to you, then give it a go!
